

Installation Instructions for IntelliJ, Eclipse, and Visual Studio Code Plugins

IntelliJ or any JetBrains Product

1. Download the IntelliJ plugin (driftin2-intellij-plugin-prod_1.0.2.zip) from DriftIN.
2. Open IntelliJ IDEA and navigate to **Settings > Plugins > Install Plugin from Disk**.
3. Select the downloaded plugin JAR and click **Apply**.

Eclipse

1. Download the Eclipse plugin (driftin2-eclipse-plugin-prod_1.0.2.jar) from DriftIN.
2. Place the downloaded JAR in the appropriate folder:
 - **MacOS:** <Eclipse_Location>/eclipse/rcp-2024-03/Eclipse.app/Contents/Eclipse/dropins
 - **Windows:** <Eclipse_Location>/eclipse/dropins
3. Restart Eclipse.

Visual Studio Code

1. Download the VS Code plugin (driftin2-vscode-plugin-prod_1.0.1.vsix) from DriftIN.
2. Navigate to **Settings > Extensions > Install from VSIX**.
3. Select the downloaded plugin VSIX and click **Install**.
4. Restart Visual Studio Code and open a new folder.

Post-Coding Instructions

1. Once you complete the coding, right click on file, select **Upload to DriftIN**.
2. The system will prompt for a User ID (which you will find on the DriftIN application).
3. The code will be uploaded as a ZIP file to S3, with unwanted directories excluded.

Note:

Installation steps are required only if the candidate is using a personal laptop.

Once you submit the code, it'll be deleted from your local
