Installation Instructions for IntelliJ, Eclipse, and Visual Studio Code Plugins

IntelliJ or any JetBrains Product

1. Download the IntelliJ plugin (driftin2-intellj-plugin-stage.jar) from DriftIN.

2. Open IntelliJ IDEA and navigate to **Settings** > **Plugins** > **Install Plugin from Disk**.

3. Select the downloaded plugin JAR and click **Apply**.

Eclipse

1. Download the Eclipse plugin (driftin2-eclipse-plugin-stage.jar) from DriftIN.

2. Place the downloaded JAR in the appropriate folder:

   o **MacOS**: <Eclipse_Location>/eclipse/rcp-2024-03/Eclipse.app/Contents/Eclipse/dropins

   o **Windows**: <Eclipse_Location>/eclipse/dropins

3. Restart Eclipse.

Visual Studio Code

1. Download the VS Code plugin (driftin2-vss-plugin-stage.vsix) from DriftIN.

2. Navigate to **Settings** > **Extensions** > **Install from VSIX**.

3. Select the downloaded plugin VSIX and click **Install**.

4. Restart Visual Studio Code.

Post-Coding Instructions

1. Once you complete the coding, select **Upload to DriftIN**.

2. The system will prompt for a User ID (which you will find on the DriftIN application).

3. The code will be uploaded as a ZIP file to S3, with unwanted directories excluded.

Note: Installation steps are required only if the candidate is using a personal laptop.
